

## **A Different Way to view all the apps on your computer (Tablet Mode)**

Although the special Tablet Mode menu was designed for use with a Windows Tablet, some Windows computer users (especially those who have touch screens) may like to have all their apps spread out on a matrix with rows and columns.

- a) Click on the **Action Center** icon (Windows + A) on the far right side of the Taskbar.
- b) Click on the **Tablet Mode** tile.
- c) Click on the **Windows** key in order to view the Tablet Mode screen.
- d) In the uppermost left corner of the screen, click on the third symbol down from the top.
- e) This view shows large tiles that can be accessed conventionally with a left-click or a right-click.
- f) Exit the Tablet Mode by returning to the Action Center icon and clicking the Tablet Mode tile.
