

ADD GOOGLE TO YOUR WINDOWS 11 S LAPTOP

Google Chrome cannot be added to a Windows 11 S machine because it is not a Microsoft product. However, if you want to have Google on your taskbar, the following workaround will work.

1. Open Microsoft Edge.
2. Enter “google.com” into the address bar and click <enter>.
3. When google.com appears, click on the three dots in the upper right corner.
4. Click on Apps.
5. Click on “Install this site as an app.”
6. Click Install.
7. Allow it to be pinned to the Taskbar

For variety, after the Google icon is open, click on <settings> in the lower right corner and click “dark theme” on the on/off button.
