

## **BEWARE OF POPUPS TELLING YOU YOUR COMPUTER IS INFECTED**

If you encounter a popup window alerting you that your computer is infected, **DON'T close the popup window** with a click of your mouse! That often triggers the secret downloading of a malware program onto your computer. Instead, **close your entire browser and restart it without restoring the previous tabs** that were open at the time. Four additional ways to close a suspicious popup window: Windows key + D key; Alt key + F4 key; Control-Alt-Delete keys pressed simultaneously, Control-Shift-Escape keys pressed simultaneously.
