

CHANGING THE DOWNLOAD LOCATION OF A LINK IN THE EDGE BROWSER

Changing the download location in Edge just happens to be one of those options that just isn't part of the program - at least, for now. There is, however, an easy way to get around the problem. Otherwise, you would have to go to your Download folder to find and open the link.

Right Click the Download Link

By far the easiest way to change the download location is to right click a link to a file you intend to download, then choose "Save Target As". You will then be prompted with a "Save as" window, which will allow you to navigate to any folder on your system to save the file.
