

DOWNLOAD AND INSTALL A LEGACY (PRE-WIN8) APPLICATION FROM THE INTERNET.

Click on **Internet Explorer** (or some other browser, such as Mozilla Firefox or Google Chrome) that appears on the Desktop's Taskbar.

From the address bar inside the browser, type the URL for the target application.

Click on the *download* button and follow the procedures that you have used in previous versions of Windows.

When the application has been downloaded and installed, it will appear in the All Apps folder of the Start Menu.

Right-click on the app and pin it to the Taskbar or to Start, or both. You can also left-drag and drop it to the desktop where it will automatically become a shortcut.
