

EDGE BROWSER HAS A NEW “SET THESE TABS ASIDE” BUTTON

You'll find a new *Set these tabs aside* button to the left of Edge's address bar. If you have a bunch of tabs open that aren't pertinent to the work at hand, just click this button and the browser will remove them from sight and store them away.

When you've finished whatever you're working on and have time to check out those tabs, click the *Tabs you've set aside* icon to the left of the *Set these tabs aside* button to bring them back.
