

ENABLE OR DISABLE THE LOCK SCREEN

1. From the search box type **power options**.
2. Choose Power Options
3. Then click on **Choose what the power buttons do**
4. Next select **Change settings that are currently unavailable**.
5. You can now move down to the bottom of the screen to find the **Shutdown Settings** section. Placing or removing a tick mark in the box next to the **Lock** option will enable or disable this feature.
