

## HOW TO MAKE A DESKTOP SHORTCUT FOR SYSTEM RESTORE

1. Right-click on a blank area of the desktop.
2. Left-click on New.
3. Left-click on Shortcut.
4. In the location box that appears, type: (or use copy and paste)  
*C:\windows\system32\systempropertiesprotection.exe*
5. Click Next.
6. Rename the icon *Create a Restore Point*
7. Click Finish.
8. Now when you want to create a new restore point (when your computer is functioning well and you want to save its settings automatically) just double-click on the new icon and when the next window appears, click *create*!
