

HOW TO CHANGE YOUR COMPUTER'S THEME

Windows themes have been used to customize desktop backgrounds, icons, user interface colors, Windows sounds and mouse cursors.

To change your computer's theme:

1. Right-click on the Desktop.
2. Then click on Personalize.
3. Select Themes from the left column.
4. Under Apply a Theme, you have several default themes from which to choose
5. If you want more options, click on *Get more themes in the Store*. You will be taken to the Microsoft Store where you will have hundreds of theme choices and dozens of pictures within each theme.
6. After the theme has been downloaded, close the current window.
7. You will be taken back to the previous window where your newly downloaded theme is now active.
8. On the next window, change the picture every (from 1 minute to one day).
9. Press Windows + D to return to the desktop to see your new theme in action.
