

HOW TO INSTALL THE APPLICATIONS YOU NEED IN WINDOWS 11

Many of the apps you rely on can be found in the Microsoft Store. And if you've purchased or downloaded those apps from the Store in the past, they will be available in your library so you can find them again more easily.

To find your previously purchased and downloaded Store apps:

1. Open the Store app.
2. Select Library in the navigation pane.
3. Then select the Apps button to display only your apps.

(You can also select Games, and/or sort the display of your content by date, name, installed, or not installed.)
