

INSTALL A LEGACY (PRE-WIN8) APPLICATION FROM A CD/DVD.

Open Windows Explorer, aka Computer or File Explorer, (Windows key + E) and follow the same procedures you have used in any of the earlier editions of Windows. When installed, the application will appear on the All Apps folder of the Start Menu. Once in the Apps folder, the application can be pinned to the **Start** screen or to the Taskbar. It can also be dragged and dropped to the Desktop where it will become a shortcut.
