

PERSONALIZE YOUR LIVE TILES (EXAMPLES: WEATHER, NEWS, SPORTS, FINANCE)

Live Tiles can display information tailored to your own interests. For example, you can set up Live Tiles that show current quotes for stocks in your portfolio, or the current weather and forecasts for any spot in the world.

Here's how the process works for a stock price. Pin the **Money** application from its Start folder and place it on the Start Screen. Click on the Money tile and then type the name of a stock you want to track, such as Apple or Microsoft, into the application's search box. Click the result, and a page for Apple (or Microsoft) will appear in the application's main window. A "pin" appears at the top of the page. Click on it and the stock page will be pinned to the Start screen and will be "live."
