

## **PLACE A WEB PAGE YOU VISIT FREQUENTLY IN YOUR BROWSER'S FAVORITES LIST**

If you have web pages that you visit frequently, you can save yourself time by saving those pages as favorites within the Microsoft Edge browser. This enables you to display the pages with just a couple of clicks.

You save favorite pages in Microsoft Edge by adding them to a special section of the browser called the Favorites list. (Click on the “moving Star” in the upper right corner of the browser.) Instead of typing an address or searching for one of these pages, you can display the web page by clicking it in the Favorites list.
