

RECOMMENDED RADIO APPS FROM THE WINDOWS STORE

When it comes to Radio apps, the Windows Store is overrun with them. But instead of talking about them all, focus on the four radio apps experts in that genre believe to be the best of the bunch.

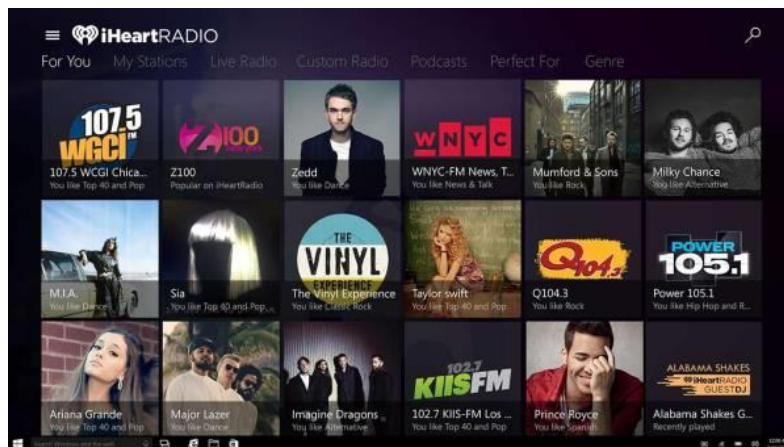

TuneIn Radio

This app is one of the most used from the Windows Store, and for good reason. It comes with a great looking design and thousands of stations from which to choose. If you can think of it, you can probably find it on TuneIn Radio.

Download TuneIn Radio from the [Windows Store](#).

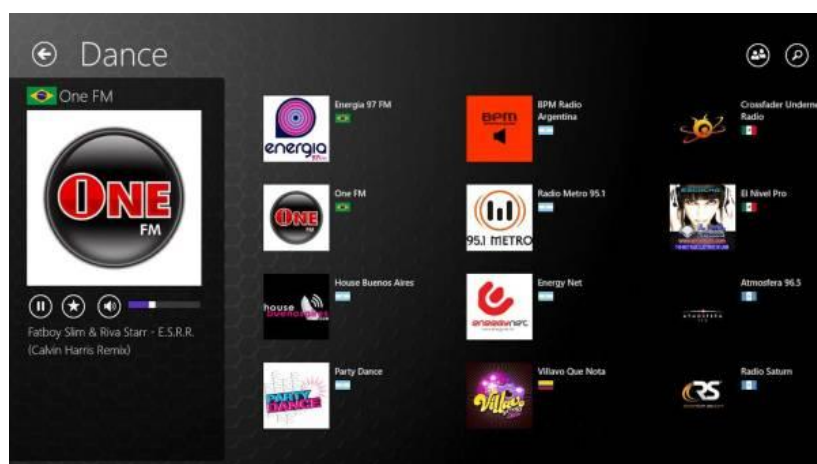

iHeartRadio

This one is similar in many ways to TuneIn Radio as they both have thousands of stations from which to choose. However, iHeartRadio has the better design. The developers put a lot of work into how the user interface looks and how everything works overall. Download iHeartRadio from the [Windows Store](#).

App Radio

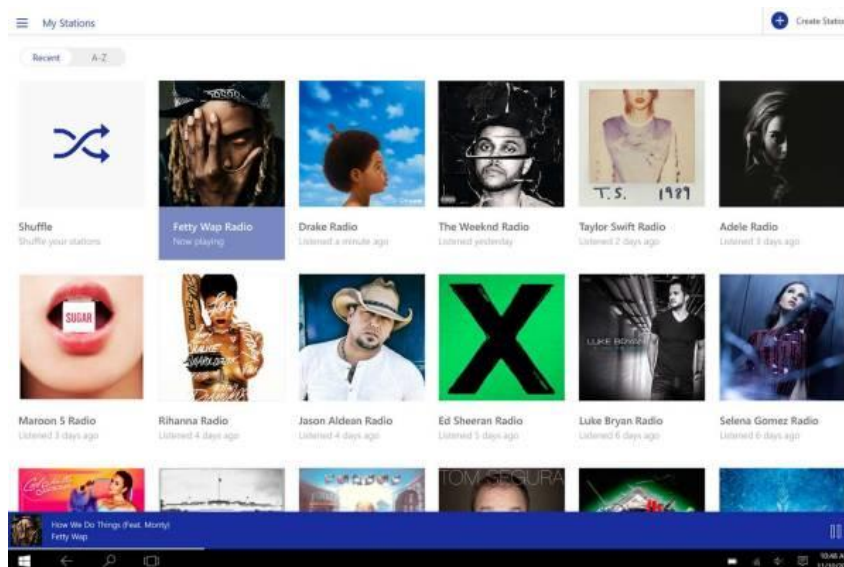

This is one of the newer radio apps from the Windows Store. Like the others, it's a free download, but unlike the others, it gives the option to get rid of the ads. To do this, users must take advantage of the in-app purchasing feature.

Now, outside of the paid stuff, this is still a free app and it works as expected. Download, install, search for your favorite radio station and play away.

Pandora

This is a great app that is available on many platforms. It's used by millions around the world and for good reason. You can search for a musician and only listen to

songs from that musician. However, it's not possible to choose the songs, this is all automatic so you'll have to listen to songs you don't like.
