

Renaming Multiple Files at One Time

It's possible to rename multiple files at one time. Say that you have a group of files such as what appears in the following figure. These may be photos that you copied from your digital camera or smart phone to a folder on your computer. (See Figure 1.)

Figure 1. A set of files to be renamed.

To rename these files all with the same name, click on one of the files then press Ctrl + A (to select all). Now right-click on any one of the selected files and select *rename*. Name the selected file and then press <enter>. In doing so, all the files now have the same name, differentiated only by a unique numeral for each.
