

## **SMARTSCREEN FILTER PROTECTS AGAINST MALWARE SITES**

SmartScreen Filter helps you identify reported phishing and malware websites and also helps you make informed decisions about downloads.

SmartScreen helps protect you in three ways:

1. As you browse the web, it analyzes pages and determines if they might be suspicious. If it finds suspicious pages, SmartScreen will display a warning page, giving you an opportunity to provide feedback and advising you to continue with caution.
2. SmartScreen checks the sites you visit against an ever-changing list of reported phishing sites and malicious software sites. If it finds a match, SmartScreen will show you a warning letting you know that the site has been blocked for your safety.
3. SmartScreen checks files that you download from the web against a list of reported malicious software sites and programs known to be unsafe. If it finds a match, SmartScreen will warn you that the download has been blocked for your safety. SmartScreen also checks the files that you download against a list of files that are well known and downloaded by many people who use Internet Explorer or Edge. If the file that you're downloading isn't on that list, SmartScreen will warn you.

### **What can I do if SmartScreen warns me about a site I visit, but I know that it's safe?**

From the warning page, you can choose to report this site as a safe site. Select More information, and then select the Report that this site does not contain threats.

If you visit a site that you think SmartScreen should warn you about in the future, you can report it to Microsoft by clicking the Tools button, pointing to Safety, and then choosing Report unsafe website.

### **Can I turn SmartScreen on or off? Yes!**

### **Is SmartScreen different from Pop-up Blocker?**

Yes. SmartScreen checks sites you visit and files you download for threats to your security. Pop-up Blocker limits most pop-ups on sites, which are usually advertisements and aren't necessarily malicious.

**Microsoft Edge** makes it easy to turn SmartScreen Filter on/off. Open Edge and go to *Settings > View Advanced Settings*. Then scroll down to the bottom under Privacy and Services and turn on/off *Help protect me from malicious sites and downloads with Windows Defender Smart Screen*.
