

THREE FREE ANTI-VIRUS PROGRAMS TO CONSIDER

Any of the following free anti-virus programs are highly regarded and deserve your consideration: [Avira](#), [Avast](#), or [AVG](#). *Remember, here is a case where more is not better!* (Windows 10 users may wish to stay with Windows Defender or add another anti-virus program after build 1607 is installed.)

In each case, whether you have installed Avira, Avast, AVG, or have kept Windows Defender, the gurus encourage the use of [Malwarebytes](#).
