

What is Bing Image Creator and How Do You Use It?

When in *creative* mode in Edge chat, you can now ask Bing to create a brand new image for you, using only your words. Just say ‘create me an image of’ or ‘draw me an image of’ and finish off with exactly what you’re looking for. Image Creator works best when you’re more descriptive, so get creative and add details like adjectives, locations, or even artistic styles such as ‘digital art’ and ‘photorealistic.’

Here’s an example: instead of typing ‘create me an image of a creature; – try typing ‘create me an image of an orange panda bear wearing sunglasses on the beach, digital art.’
